Sounds good. I'll let her know that she will get the info on Monday.

Subject: Oil Sample documentation - Exxon Mayflower

Bill:

I was in the process of pulling together the documentation for the oil sampling yesterday to give to the AG's office.... but, I realized as I was going through the chain of custody forms that we were missing the COC for the private lab.... we have the COC for the Coast Guard lab.... I called Heth and he clarified the situation for me.... they have shipped the samples to the Coast Guard already but, the lab in Little Rock has to wait until Monday for delivery so, Weston has not filled out the COC forms.

So, Heth has committed to taking the samples to the lab in Little Rock first thing on Monday morning (8 am) so we will then have both COCs plus photos of the two sample locations ready to send to the AG folks Monday morning.

I hope this is okay.... I'm hoping no one at the AG's office will be looking for this documentation on a Sunday.
